

# Stress-induced mutagenesis & complex adaptation

Yoav Ram

Hadany Lab

Dept. of Molecular Biology and Ecology of Plants

Life Sciences Faculty

# Stress-induced mutation

# Causes and consequences of Stress-induced mutation

- **Evolution of stress-induced mutation:**

- SIM can evolve due to 2<sup>nd</sup> order selection
- In constant and changing environments

Ram & Hadany, Evolution 2012

- **Consequences of stress-induced mutation:**

- **Effect on complex adaptation**

Ram & Hadany, Proceedings B 2014

# Adaptive peak shifts

Sewall Wright

← Fitness →

← Genotype →

# Methods

- **Model**

$$p' = \frac{p}{p + (1 - p)(1 - s)}$$

- Follow allele frequencies over many generations
- Probability of appearance of adapted mutant
- Probability of fixation of adapted mutant

- **Simulations**

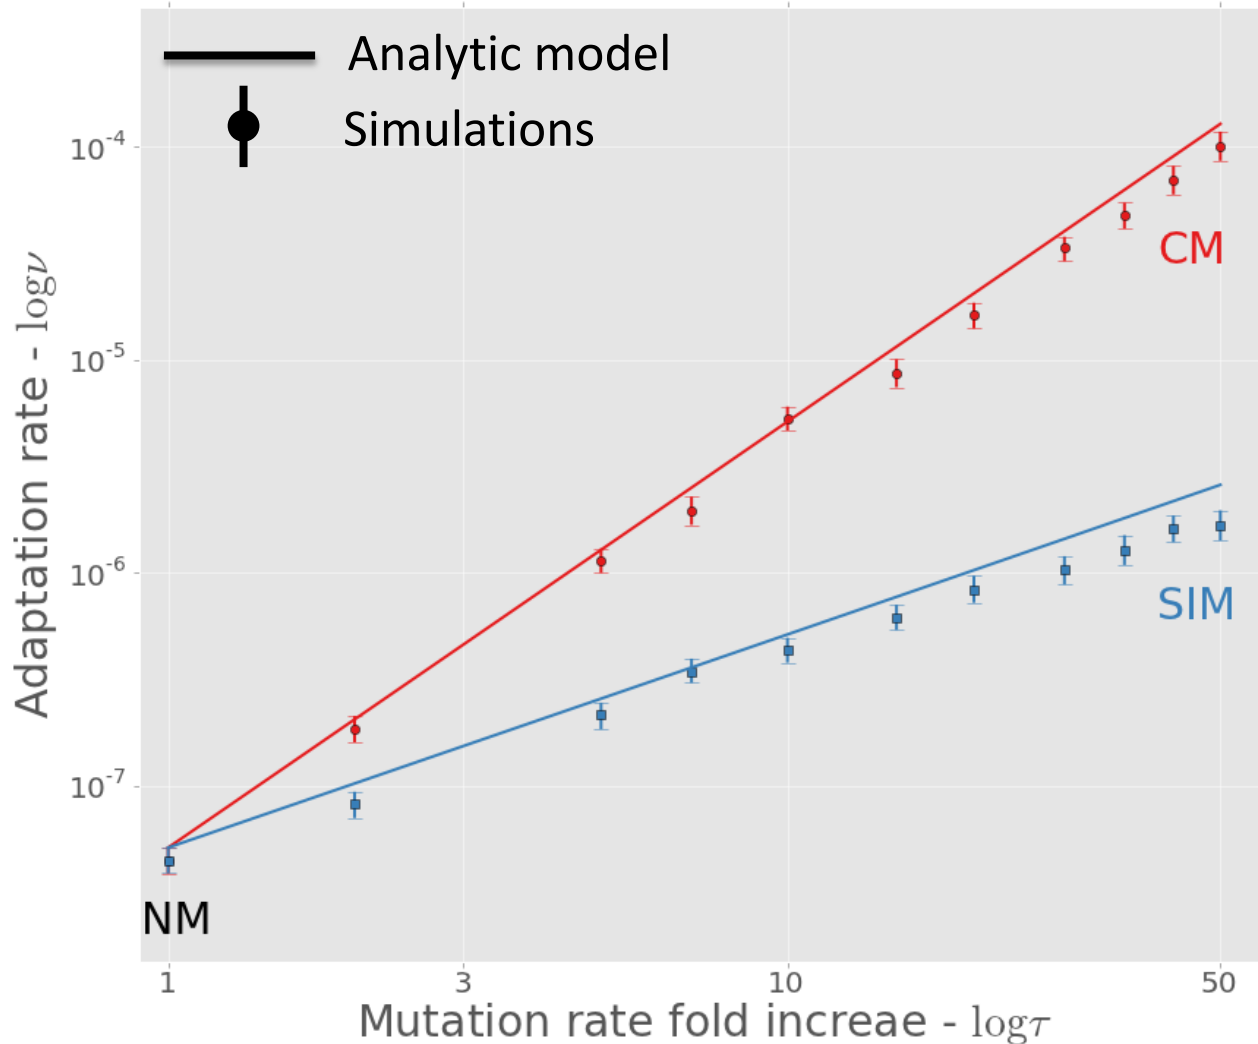

- Stochastic realizations of analytic model
- Statistical analysis of many replicates

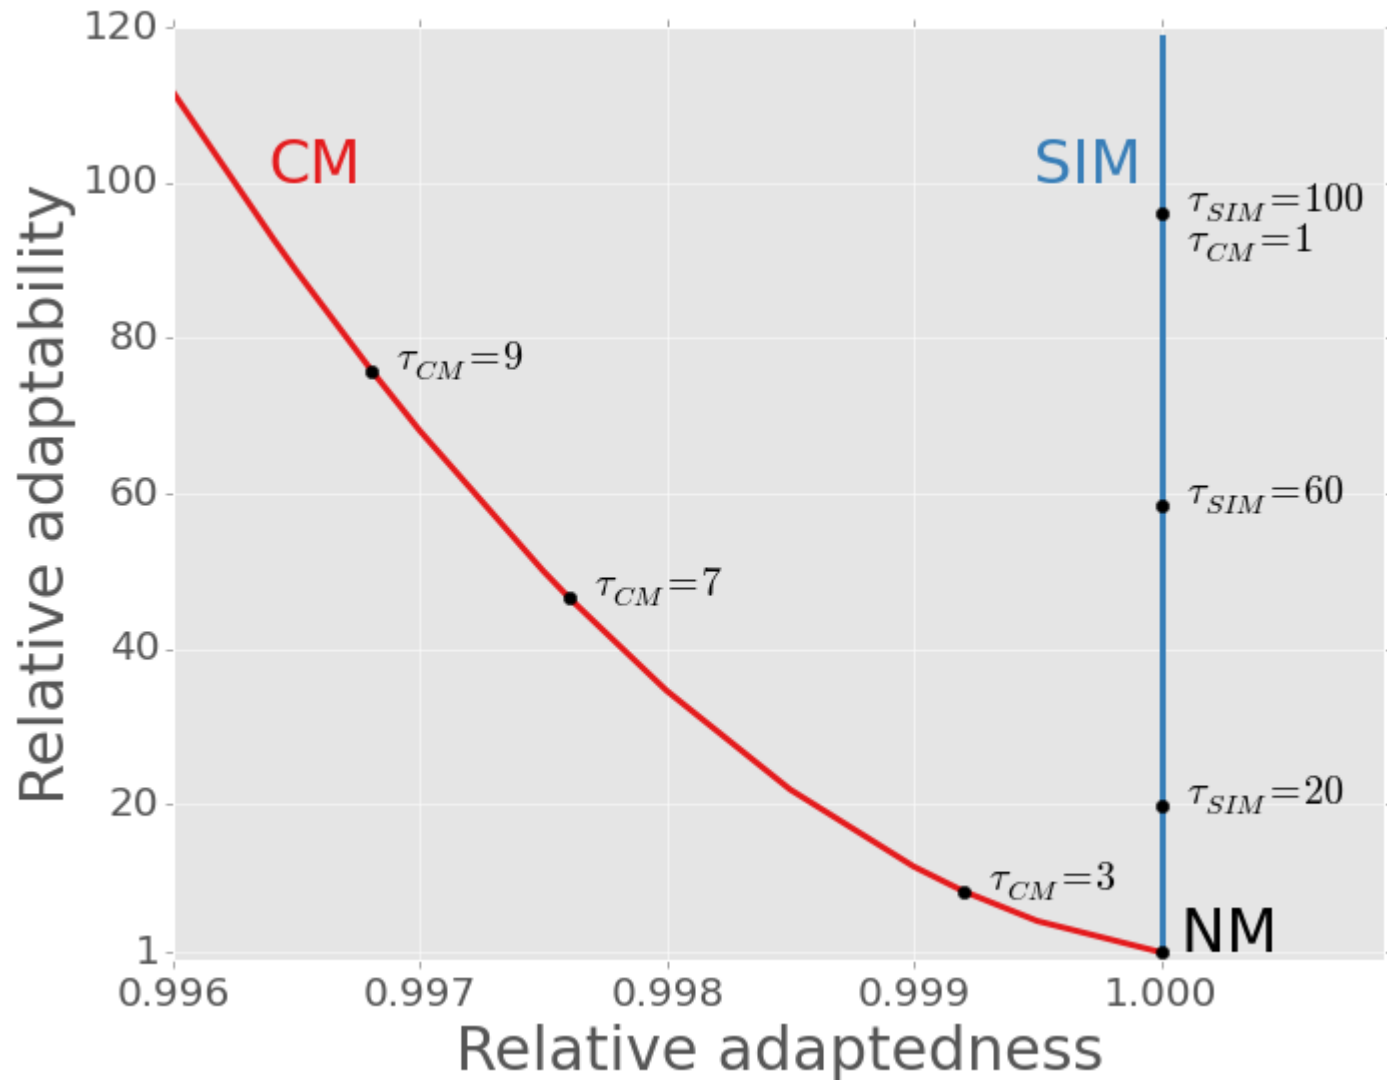

# Adaptation rate

CM: constitutive mutation

SIM: stress-induced mutation

# SIM breaks the trade-off between *adaptability* and *adaptedness*

# Acknowledgments
